Pakistan (51220)

INTRODUCTION

This catalogue has been produced to show some of the most popular General Surgical Instruments available from our complete product range. Most surgical procedures will require a selection of general instruments and additional instrumentation specifically for the procedure involved, i.e. Gynaecology, Orthopaedics, E.N.T., Plastic Surgery etc. This catalogue illustrates the wide range of products which will commonly be used in most surgical procedures.

We have listed a large selection of dissecting forceps, artery forceps, needle holders, retractors, scissors and other essential items for general procedures. Whilst the content of this catalogue has been carefully prepared with input from leading hospitals and consultants throughout the world, the range is by no means exhaustive or a full listing of our complete range. We produce over 6,000 surgical instruments covering all areas of surgery.

The common thread through our product range is quality. All our surgical instruments are made of the highest grade stainless steels to exacting tolerances and specifications to produce some of the finest instruments available in the world. With over 17 years of manufacturing expertise, we believe our instruments provide excellent clinical

performance and will provide years of trouble free service. Our instruments are fully autoclaveable and covered by our unrivalled Lifetime Guarantee. If a product fails during its working life, due to a manufacturing or material defect, we will repair it or replace it - free of charge, with the minimum of fuss and delay. Can your current instrument provider deliver the same promise and back it up?

We hope this catalogue will give you a flavour of the exceptional range of quality surgical instruments we produce.

QUALITY STANDARDS

All our reusable theatre instruments conform to the medical services directive 93/42/EEC. Our instruments are manufactured to conform to the following standards (where applicable):

BS 5194-2
BS 5194-3
BS 5194-4
BSEN ISO 13402

Quality of Steel

Our instruments are manufactured from steel conforming to BSEN ISO 7153-1 or BS 5194-1 (where applicable). We are certified to ISO 13485 and all of our instruments are CE marked.
